Heavy load up to	80 lb	

Feats

Power Attack

You can make exceptionally deadly melee attacks by sacrificing accuracy for strength.
You can choose to take a -1 penalty on all melee attack rolls and combat maneuver checks to gain a +2 bonus on all melee damage rolls. This bonus to damage is increased by half (+50%) if you are making an attack with a two-handed weapon, a one handed weapon using two hands, or a primary natural weapon that adds 1-1/2 times your Strength modifier on damage rolls. This bonus to damage is halved (-50%) if you are making an attack with an off-hand weapon or secondary natural weapon. You must choose to use this feat before making an attack roll, and its effects last until your next turn. The bonus damage does not apply to touch attacks or effects that do not deal hit point damage.

Dodge

Your training and reflexes allow you to react swiftly to avoid an opponent's attack.
You gain a +1 dodge bonus to your AC. A condition that makes you lose your Dex bonus to AC also makes you lose the benefits of this feat.

Weapon Focus (longsword)

You are especially good at using your chosen weapon.
You gain a +1 bonus on all attack rolls you make using the selected weapon.

Abjuration Wizard Spells

Arcane Bond **+1**

At 1st level, wizards form a powerful bond with an object or a creature. This bond can take one of two forms: a familiar or a bonded object. A familiar is a magical pet that enhances the wizard's skills and senses and can aid him in magic, while a bonded object is an item a wizard can use to cast additional spells or to serve as a magical item. Once a wizard makes this choice, it is permanent and cannot be changed.

Arcane School

A wizard can choose to specialize in one school of magic, gaining additional spells and powers based on that school. This choice must be made at 1st level, and once made, it cannot be changed. A wizard that does not select a school receives the universalist school instead.

A wizard that chooses to specialize in one school of magic must select two other schools as his opposition schools, representing knowledge sacrificed in one area of arcane lore to gain mastery in another. A wizard who prepares spells from his opposition schools must use two spell slots of that level to prepare the spell. In addition, a specialist takes a -4 penalty on any skill checks made when crafting a magic item that has a spell from one of his opposition schools as a prerequisite. A universalist wizard can prepare spells from any school without restriction.

Each arcane school gives the wizard a number of school powers. In addition, specialist wizards receive an additional spell slot of each spell level he can cast, from 1st on up. Each day, a wizard can prepare a spell from his specialty school in that slot. This spell must be in the wizard's spellbook. A wizard can select a spell modified by a metamagic feat to prepare in his school slot, but it uses up a higher-level spell slot. Wizards with the universalist school do not receive a school slot.

Arcane School Tracker

CMB

Cantrips

Wizards can prepare a number of cantrips, or 0-level spells, each day. These spells are cast like any other spell, but they are not expended when cast and may be used again. A wizard can prepare a cantrip from an opposed school, but it uses up two of his available slots.

Spells

A wizard casts arcane spells drawn from the sorcerer/wizard spell list presented in Chapter 10. A wizard must choose and prepare his spells ahead of time.

To learn, prepare, or cast a spell, the wizard must have an Intelligence score equal to at least 10 + the spell level. The Difficulty Class for a saving throw against a wizard's spell is 10 + the spell level + the wizard's Intelligence modifier.

A wizard can cast only a certain number of spells of each spell level per day. His base daily spell allotment is given on Table 3-16. In addition, he receives bonus spells per day if he has a high Intelligence score (see Table 1-3).

A wizard may know any number of spells. He must choose and prepare his spells ahead of time by getting 8 hours of sleep and spending 1 hour studying his spellbook. While studying, the wizard decides which spells to prepare.

Conditions	**Normal**

Pets

No animal companion or mount.

Actions

+2 to One Ability Score

Human characters get a +2 bonus to one ability score of their choice at creation to represent their varied nature.

Bonus Feat

Humans select one extra feat at 1st level.

Languages

Humans begin play speaking Common. Humans with high Intelligence scores can choose any languages they want (except secret languages, such as Druidic).

Medium

Humans are Medium creatures and have no bonuses or penalties due to their size.

Skilled

Humans gain an additional skill rank at 1st level and one additional rank whenever they gain a level.

Normal Speed

Humans have a base speed of 30 feet.

Human

Speed: Walk 30 ft.

Bonus Feat **+1**

Humans select one extra feat at 1st level.

Skilled **+1**

Humans gain an additional skill rank at 1st level and one additional rank whenever they gain a level.

Spellbook

Light — Evocation

This spell causes a touched object to glow like a torch, shedding normal light in a 20-foot radius, and increasing the light level for an additional 20 feet by one step, up to normal light (darkness becomes dim light, and dim light becomes normal light). In an area of normal or bright light, this spell has no effect. The effect is immobile, but it can be cast on a movable object. You can only have one light spell active at any one time. If you cast this spell while another casting is still in effect, the previous casting is dispelled. If you make this spell permanent (through permanency or a similar effect), it does not count against this limit. Light can be used to counter or dispel any darkness spell of equal or lower spell level.
Casting time: 1 standard action
Components: V, M/DF
Descriptor: Light
Duration: 0 minutes
Range: Touch
Saving throw: None
School: Evocation
Spell resistance: No
Target or area: Object touched
Descriptor: WoodSchool

Fireball — Evocation

A fireball spell generates a searing explosion of flame that detonates with a low roar and deals 1d6 points of fire damage per caster level (maximum 10d6) to every creature within the area. Unattended objects also take this damage. The explosion creates almost no pressure. You point your finger and determine the range (distance and height) at which the fireball is to burst. A glowing, pea-sized bead streaks from the pointing digit and, unless it impacts upon a material body or solid barrier prior to attaining the prescribed range, blossoms into the fireball at that point. An early impact results in an early detonation. If you attempt to send the bead through a narrow passage, such as through an arrow slit, you must "hit" the opening with a ranged touch attack, or else the bead strikes the barrier and detonates prematurely. The fireball sets fire to combustibles and damages objects in the area. It can melt metals with low melting points, such as lead, gold, copper, silver, and bronze. If the damage caused to an interposing barrier shatters or breaks through it, the fireball may continue beyond the barrier if the area permits; otherwise it stops at the barrier just as any other spell effect does.
Casting time: 1 standard action
Components: V, S, M
Descriptor: Fire
Duration: Instantaneous
Range: 400 ft.
Saving throw: Reflex half
School: Evocation
Spell resistance: Yes
Target or area: 20-ft.-radius spread
School: FireSchool
